Laser & Photonics: An Integral Part of Industrial Innovation

Tuesday, February 27, 2024 10:00 AM - 11:00 AM EST

[Register Now](#)

Presented by

ams

OSRAM

Lasers, LEDs, and photonics in general are providing new dimensions to industrial automation solutions, far beyond illumination and material treatment. They enable open work-cell production setups as part of Industry 4.0, allow machines to sense their environment efficiently, and are opening completely new use cases for human-machine interaction. This presentation provides an insight into state-of-the-art optical solutions beyond lighting, indicating how optical emitter and detector components support industrial automation and which compelling innovations could be discovered with these technologies. Presented by [ams OSRAM](#).

Upcoming Webinars

- [From Theory to Practice: Coherent Beam Combining's Impact on Laser Technology](#), 2/15/2024 10:00:00 AM EST
- [Quantum Efficiency Measurements: Fundamentals for Solar Cell Research, Part 2](#), 2/21/2024 1:00:00 PM EST

Archived Webinars

- [An End-to-End Approach to the Challenges in PIC Packaging](#)
- [Automation Technologies to Scale PIC Testing from Lab to Fab](#)
- [Photonics Goes Mainstream: Channeling Semiconductors' Challenges](#)
