

sneak PREVIEW

SPIE Optifab – Rochester, NY

October 13 - 15

An advance look at the products, trends and technologies being presented.

Latest Research, Technologies Slated for SPIE Optifab 2015

SPIE's Optifab will be held Oct. 12-15, 2015 at the Rochester Riverside Convention Center in Rochester, N.Y. Organized jointly by SPIE and APOMA, this is the largest optical manufacturing

conference and exhibition held in North America. The event has a technical focus on classical and advanced optical manufacturing technologies. Hundreds of companies from throughout North America and around the world will exhibit new and existing technologies, as well as new technical possibilities. The exhibition serves to connect researchers, scientists and engineers with potential suppliers.

Featured Exhibitors

[ATS 200 - Alignment Turning Station](#)

From: **TRIOPTICS GmbH**

ATS 200 is used to machine mounted lenses. The symmetry axis of the mount coincides with the optical axis of the mounted lens. The remaining centration error of a mounted lens after machining with ATS 200 is $< 1 \mu\text{m}$.

[Freedom of Freeforms](#)

From: **OPTIMAX SYSTEMS, INC.**

Optimax is set-up to manufacture, test and deliver high precision optics, including aspheres, cylinders, prisms, spheres and now freeforms. Freeforms have fewer elements, lighter weight and increased flexibility. Stop by and see our new freeform demo.

[OptoTech PPM 80 NC](#)

From: **OPTOTECH OPTICAL MACHINERY INC.**

The new OptoTech PPM 80 NC is a NC-controlled polisher especially developed for high precision lapping and polishing of high aperture optics (e.g. domes, single lenses and spot blocks) with an aperture angle $>80^\circ$ using ball pin technology.
