LIGHT
Introduction to Optics and Photonics

by Judith F. Donnelly, Dr. Nicholas Massa

Offering a comprehensive treatment of the subject as well as key applications, and employing minimal math, *LIGHT: Introduction to Optics and Photonics* was written with readers in mind. This textbook is for beginning students of optics and photonics in high school, community college, and university STEM courses as well as for teachers and non-optics industry professionals looking for a basic understanding of the subject.

Key topics include light, diffraction, refraction, polarization, optics, photonics, lasers and laser applications, laser safety and fiber optics. Every topic is clearly illustrated with photographs and drawings. End-of-chapter problems are included, and a solutions manual is available to educators from the authors.

Softcover: \$69
Hardcover: \$89
