Stabilizing the Line of Sight

By Peter J. Kennedy and Rhonda L. Kennedy

Comprehensive in scope, this book will give readers a better understanding of the relationships between the various engineering disciplines that are required for successful LOS control, and will provide them with a detailed methodology for LOS stabilization system design as well as the algorithms essential for analyzing stabilization dynamics.

LOS control ensures that the observer maintains a clear field of view, regardless of disturbances. Compensating for disturbances to the LOS derived from platform rotation or vibration, or LOS stabilization, is critical to LOS control and the primary focus of this book.

Softcover: \$89
Hardcover: \$109

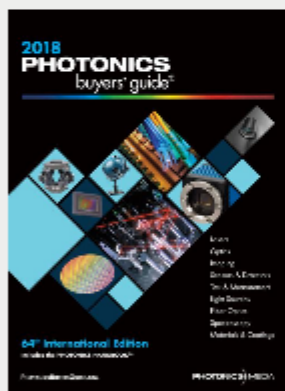

Use Code **APRIL2018!**

Engineers, engineering managers, engineering students and educators involved in the design of pointing systems will benefit from this guide to effective LOS control and stabilization design.

ACT NOW and SAVE! Order *Stabilizing the Line of Sight* by April 30th and use Coupon Code **APRIL2018 for free shipping!**
