The New Collar Workforce

An Insider's Guide to Making Impactful Change in Manufacturing and Training

by Sarah Boisvert

If you hire, train or manage a manufacturing workforce; work in economic and workforce development; or educate or parent students who are searching for a career path, you should read this book.

U.S. manufacturing companies of all kinds are expected to face a shortage of two million skilled workers by the year 2020, according to reports. As a result, manufacturers and educators are looking for real, actionable ideas to train workers, reduce the shortfall and realize the potential of the new age of manufacturing.

Author Sarah Boisvert, co-founder of the commercial division of Potomac Photonics Inc., of Baltimore, Md., is an innovative leader in high-tech product commercialization and digital fabrication. In this book, she prepares those involved for transformations in the factory and offers new options for training in digital factory work.

Softcover: \$34.95
