

# PHOTONICS MEDIA THE BOOKSTORE

**SALE ENDS JUNE 30TH! USE CODE JUNE2018 TO SAVE 15% OFF THE LIST PRICE!**

## Remote Sensing

From space and the sky around us to firmly on the ground, remote sensing is providing an important view of our surroundings that can't be seen with our eyes alone. A variety of optical technologies are having an impact on applications as diverse as agriculture and defense, weather and climate, and are now part of the payload on satellites, planes and drones, and riding in and even guiding vehicles on the highway.

Remote Sensing is for anyone working with the relevant technologies or considering the application of optical remote sensing. It also will serve as an introduction for those completely new to the subject.

This comprehensive new resource includes sections on multispectral imaging, hyperspectral imaging, lidar, terahertz sensing, and more – plus a glossary of terms.

List Price: \$69
