THE PULSE OF THE INDUSTRY

## FREE WEBINAR

### Integrating Camera Technology Into an Outstanding Machine Vision Solution

Join us for a Webinar on Fri, Mar 10, 2017 1:00 PM - 2:00 PM EST

Are you planning an update or a new build of a machine vision system? Get it right the first time, by spending an hour with Rex Lee, Ph.D., a machine vision professional with more than four decades of experience in business and academe.

**Who should attend:** Engineers, designers, business owners, scientists, educators and anyone who is considering using cameras for image analytics. The presentation will include examples using machine vision to solve problems in every industry.

Lee will discuss the components of a successful machine vision system:

- Cameras
- Lighting
- Lenses
- Software
- Sensors
- Detectors

Selecting the wrong camera for your application can result in a failed machine vision solution or one that is costly and underperforming. This one-hour, free webinar will help ensure that when it comes to camera technology, you make the right decision.

You will learn how to determine the correct specifications for a solution to your application; and how to determine if a turnkey solution is right for you. You will be guided through the myriad of choices available, to the combination of components that will best suit your specific needs.

Presenter Rex Lee has more than 40 years of experience, including 25 years in scientific and industrial applications. As CEO and president of Pyramid Imaging, Inc., he heads a business that distributes and integrates machine vision solutions and video imaging systems for a range of industries, including security, manufacturing, aerospace, defense, building and construction, and R&D. He holds two patents related to high-density electronic packaging, and serves on the Board of Directors for the Automated Imaging Association.

### MARK YOUR CALENDAR

**Date:** Fri, Mar 10, 2017

**Time:** 1:00 PM - 2:00 PM EST

**Space is limited.** Reserve your Webinar seat now at:  
<https://attendee.gotowebinar.com/register/123197357706735619>

After registering you will receive a confirmation email containing information about joining the Webinar.

### SYSTEM REQUIREMENTS

PC-based attendees  
Required: Windows® 10, 8, 7, Vista, XP or 2003 Server

Mac®-based attendees  
Required: Mac OS® X 10.6 or newer

Mobile attendees  
Required: iPhone®, iPad®, Android™ phone or tablet, Windows 8 or Windows Phone 8

Visit Photonics Media to watch past webinars on demand to learn more about the latest developments in lasers, imaging, optics, biophotonics, machine vision, spectroscopy, microscopy, photovoltaics and more.
